RSU SAYS PREVENTION IS BETTER THAN CURE

Local PC repairer, RSU Computer Solutions announced its slogan this week - "Prevention is Better than Cure!"

Proprietor Craig Rowe said the common cliché was selected as his business slogan because he believed it applied to the health of computers.

He said RSU Computer Solutions did not just have the responsibility to solve people's computer problems, but had an obligation to educate people on how to maintain their valuable equipment.

"Dust is a major contributing factor to hardware failure, as is poor ventilation and moving PC equipment around," he said.

"People tend to focus on scanning for viruses and defragmenting their hard drive, however there are many other preventative measures they need to take to avoid failure or data loss.

"Getting into the habit of maintaining the health and integrity of your system will save you time and money in the long run," he said

Tips to help you take preventative measures can be downloaded at www.rsu.com.au.
